

GOUR MEDICAL SA announced today that it has entered into an agreement with Medicom Healthcare to provide high-quality Eyecare products for dogs, cats and horses.

December 18, 2015

ZUG, Switzerland - Gour Medical SA, a veterinary biomedical company, announced today the signing of an agreement with Medicom Healthcare to provide high-quality Eyecare products for animals including eye wipes and eye lubricants.

Gour plans to launch the Eyecare products for animals in the market during 2016.

About Gour Medical SA

Gour Medical SA, founded in 2014, is a Swiss based veterinary biomedical company, leveraging the advances in human research and applying them to medical solutions for companion animals. Integrated and innovative therapeutic solutions developed by Gour address companion animals' unmet medical needs by treating or preventing significant companion animal health issues.

Gour has already signed several cooperation agreements with world renowned companies and laboratories for the development and commercialization of various animal healthcare products.

About Medicom Healthcare

Medicom Healthcare, is a specialty Ophthalmic company focused on the design, development, manufacturing and commercialization of eye care products. Since 2007, Medicom Healthcare has developed and launched 25 eye care products globally.

Simon Martin, CEO, Medicom Healthcare said, "we are very excited to partner with Gour Medical to extend top quality eye care products to companion animals all over the world."
